Enrio’s aims are:

• To facilitate **discussions and share experience** and possible solutions related to the investigation of allegations of misconduct in (academic) research and related to the training and education with regard to good practices for research;

• To report **discussions and develop proposals**, for submission to national and international organisations on matters of investigation on matters of investigations and training;

• To **liaise and work in partnership with other organisations** with European or global interests in research integrity.
Enrio strength:
learning from each other

A) Exchange of information and comparison of situation:
   - countries with little experience
     • in the field of investigation of allegations of misconducting,
     • in the field of training and education about RI
   - countries with more experience
     • well developed system (local and national level)

B) Improve and support the members by institutionalising RI at the own national level
Enrio is ... 
the unique European functioning network on research integrity

Europe still needs common standards and common rules in research integrity

Enrio is a good team player ready to provide a unique experience and know how on research integrity
