What if...

Careers in research were attractive, sustainable, and well-supported by both the public and private sector?

? How can you contribute to making this a reality?
What do you expect from others?

A VISION & FRAMEWORK FOR RESEARCH CULTURES

Shaping the future of research

What if...

The research sector was a role model to other sectors on transparent, fair, and sustainable policies and practices?

**How can you contribute to making this a reality?
What do you expect from others?**

What if...

All research was done at the highest levels of integrity and ethics, and all research processes were entirely trustworthy?
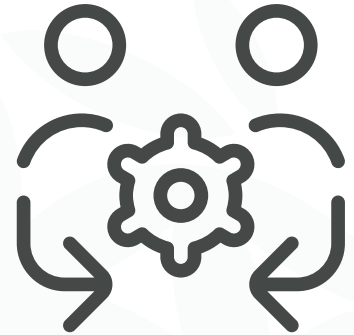

? How can you contribute to making this a reality?
What do you expect from others?
