NO-PAY PUBLISHING: USE INSTITUTIONAL REPOSITORIES

DIGITAL.CSIC is the institutional repository of the Spanish National Research Council

Psicológica is the journal of the Spanish Society for Experimental Psychology

The collaboration, started in 2021, enabled the relaunch of the journal as Diamond OA

Repository Diamond OA

- Psicológica performs all the activities of a scholarly journal
- Relies on the DIGITAL.CSIC repository for all publication services (preprint publication, peer review management, digital preservation, persistence, metadata curation, DOI minting, support for database indexing and harvesting by aggregators and search engines...)
- [Psicológica Journal | DIGITAL.CSIC](#)

UNESCO and the European Council, amongst others, strongly recommend open, equitable and sustainable scholarly publishing system, free to readers and authors.

Institutional repositories run by research institutions offer an inexpensive and sustainable route to realizing a sustainable scholarly publishing system.

Such repositories are non-profit, ubiquitous and capable of hosting Diamond OA academic journals, which are free to publish and to read (Bernal & Perakakis, 2023).

Bernal, I., & Perakakis, P. (2023). [No-pay publishing: use institutional repositories](#). *Nature*, 619, 698.

AWAY FROM COMMERCIAL PUBLISHER

Transferred in 2022 from a commercial publisher, *Psicológica* publishes about 50 articles, preprints and peer reviews annually.

SUSTAINABLE COST

Publication costs are shared between the society and publicly funded DIGITAL.CSIC.

Estimated cost of €30 (US\$34) per publication.

INNOVATION IN PRACTICE

Open Peer Review widely accepted by contributing authors.

Submissions rate has increased.

A model for other scholarly societies and research groups.
